# CCTV - Security Camera

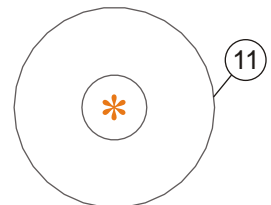

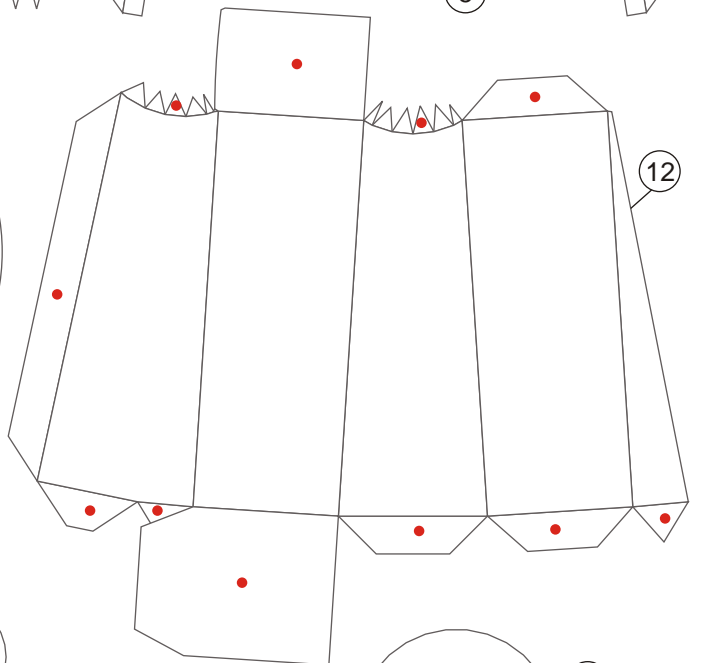

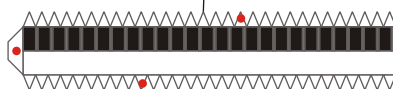

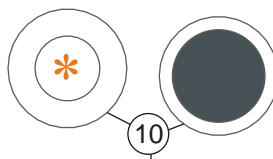

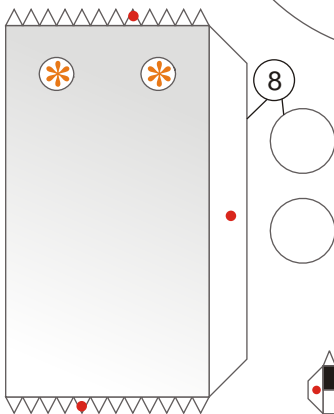

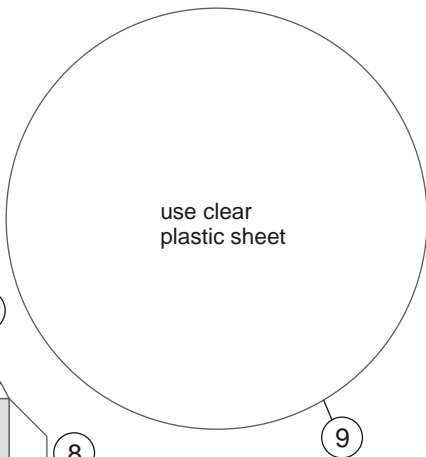

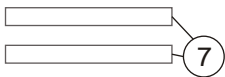

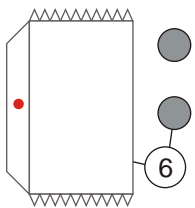

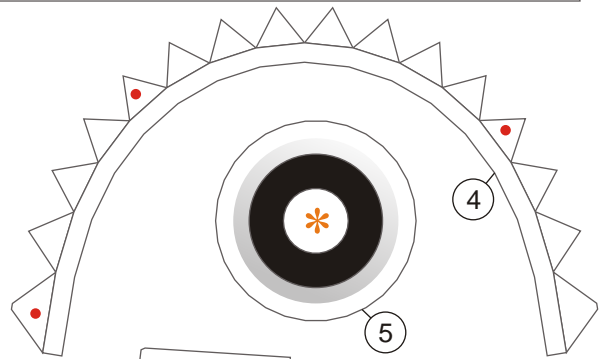

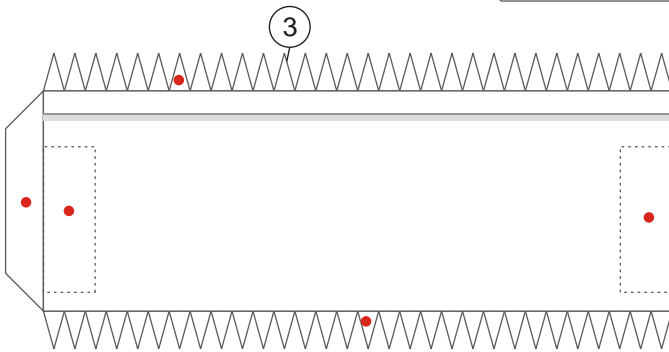

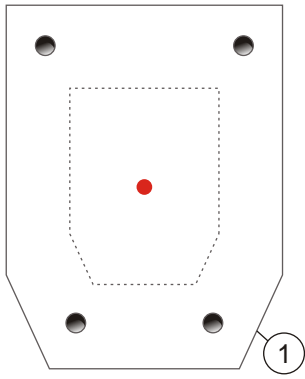

Scale 1:1

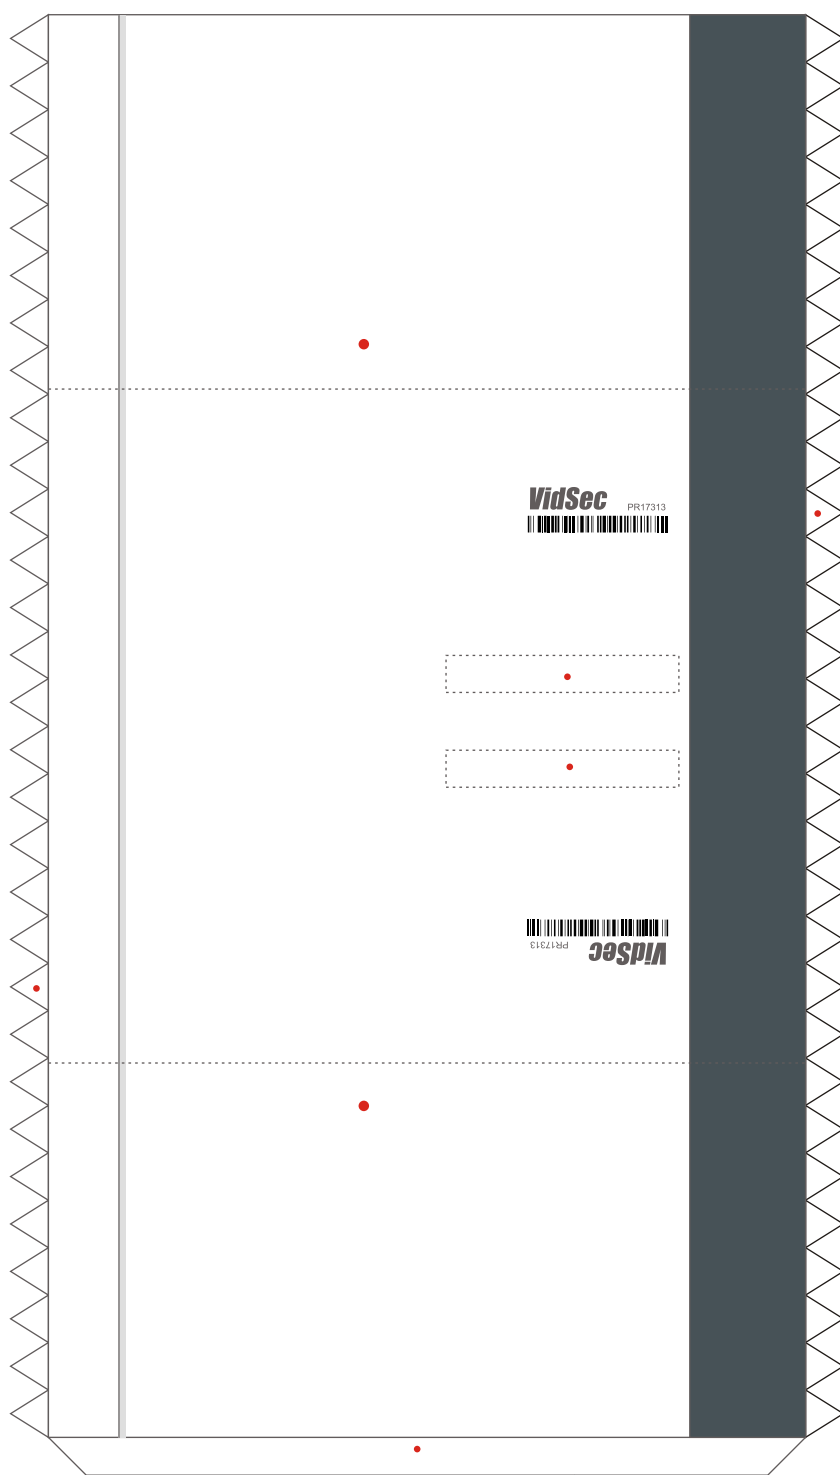

There were some people who asked for CCTV camera paper model link on Paper Replika Facebook page. There are already 2 existing CCTV cameras model around the net, they are simple but the idea is cool. So I thought it would be cool too if I made my own version of security / CCTV camera. This camera template is quite simple, it only has 2 pages. I color it mainly white, so it will be like ink-saver. If you think infrared camera is too much, there are 2 options to choose, infrared camera and ordinary lens. You can choose which one to build, or both. I remember when I was searching a shop who sell dummy CCTV camera for my Dad, this "dummy" camera could be useful as well. This CCTV is move-able, so you can adjust the camera angle up and down or rotate it to the left and right.
